

IN THIS ISSUE

VENTURING IN UK IS NO MORE A HASSLE

WITNESS THE AI BLEND AT OUR PORTAL

SUPER HOUSE: A GAME CHANGER

BEST OF 5 STARTUPS

From India to UK

We incepted in 2016 and within a year of Inception, we could successfully venture in the United Kingdom.

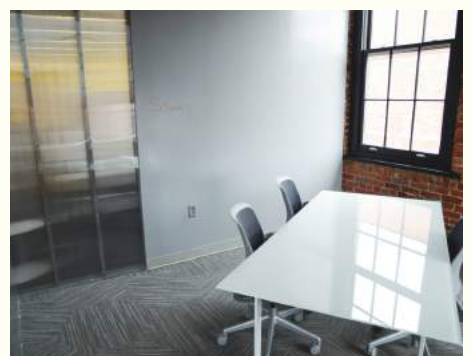

Today, we are proud incubator of 18 early stage startups from diversified industry segments largely from clean tech & electric vehicle.

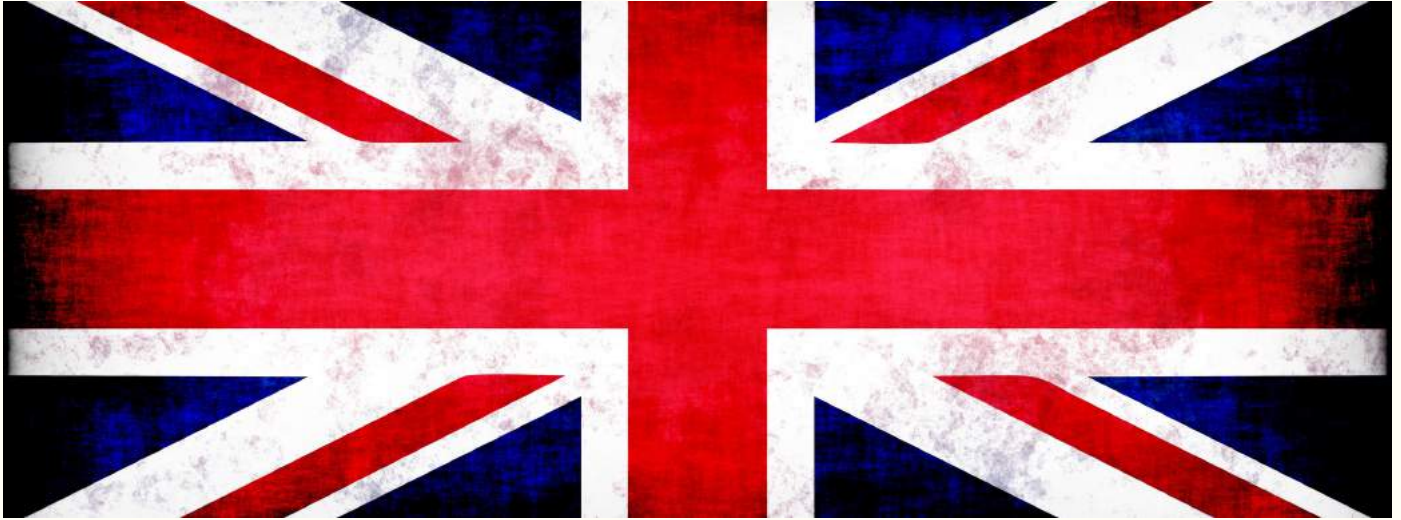

As we are growing, we are also moving towards the exit of our first batch in December 2017, at the same time our second batch is scheduled to start from September 2017.

This issue covers the activities done in last 2 months at RE-Rise. We were very well able to venture in Ranchi with our partner Culture Colab to become the first incubator of such stature in the state of Jharkhand.

We also initiated Super House, details of which is covered in this issue.

We thank all our Mentors, Startups & Investors for continued support in making RE-Rise a success & growing rapidly.

Venturing in the UK is no more a hassle

by Shayoni Mazumder

Learning new markets and finding opportunities for our Incubatees in such markets have always been our lookout. To shape it better, we started "Cross-Border Engagement Program" along with our UK entity and Innovation Birmingham, UK. In this program, we help startups from India to venture and explore UK market for their products and vice-versa.

Any startup selected for CBEP, gets a soft landing process support for 6-months in the UK to establish a business. They are supported with Infrastructure support, Business Validation & Consumer Connect services of RE-Rise

Witness the AI blend at our portal

To give a real-time virtual experience to startups & mentors, we have introduced a virtual screening system for intake of startups, daily operations, review processes, GELP etc. with a blend of Artificial Intelligence "KARA". At this stage, "KARA" assists any one to register & guide through the process. However, we aim to make "KARA" a talk-bot assisting & reviewing startups. This implementation has significantly cut down our manpower requirement.

An HR Tech company -Campus Puppy

by *Nikhil Verma, Founder-Campus Puppy*

Eradicating the gap between employers and potential candidates, CampusPuppy, considers a need in this era to connect an individual with a company, based on his/her specific skill set and expertise in it.

At Campus Puppy, we aspire to give the young students a professional social networking platform which will link them to faculties and the desired employers. What makes us stand a notch apart from others in the market is our promise of providing the students with only high quality professional networking experience. And we will ensure this via a set of channels which will authenticate all the user information. Our aim is to help the young minds reach a step closer to their dream job. The students can be a part this experience by simply creating their profile on the CampusPuppy.com. Then they can fill in their details by choosing from a variety of skill sets available for adding them to their respective profiles. These will then pass through several filters and we will make sure that they reach the top notch employers. And then they will be just a click away from your dream job. We offer a large number of filters for the students to make sure that only the desired employers approach them. Our aim is to connect both these parties directly. We are here to offer you a 360 degree solution to all the professional and personal problems that all college going students face! We, at Campus Puppy aim to pioneer in the field of professional education and employment. The students can look for internships and jobs on our portal and the employers can get in touch with the desired applicants on the basis of the skills they possess. We also have the facility where the students can interact with the faculty members to find answers to their queries. We are providing solutions which are just a click away and a platform that provides one in all solutions to the students.

The gaming saga begins-Trapgaming

by Jasmeet Singh, Co-founder-Trapgaming

Looking at the rapid growth of Gaming and eSports across the world, Trap Gaming looks to make the most of the already primed gaming market in India. We work for an industry which has already overdeveloped when it comes to participation. Fuelled by the community's passion for gaming and the target audience that makes up for more than 50% of the 1.3 Billion people in India, one can easily understand the potential of this industry.

Our founding team consists of an interdisciplinary mix of individuals. Kapil Thakur (The Gamer and community manager) has spent more than 7 years in the gaming industry including 5 years of formally and informally servicing it. Jasmeet Singh (The Business manager) has a very strong background in import, export and logistics. With this strong business ties in India and China we will be able to make the most of our reach in the Gaming industry. Last but not least, Anugrah (The content developer) makes a living through understanding what his target consumer needs and he makes it a point that he produces content that is engaging and disruptive. We have a team that is ready, willing and able to do what is needed to make sure that this industry makes a lasting impact. We see the current market state as a great opportunity which will stimulate spending and potentially create thousands of jobs in the years to come.
